

DTHR 300 Drilling Ring Supplies, accessories & spare parts

Item	Description	Qty
1	GETECH DTHR 300 hydraulic top drive rotary rig, operated by separate on-deck engine, mounted onto an IVECO Euro Trakker AD380T38H 6x4 truck with:	1
2	IngersolRand air compressor 540cfm/175 psi operated by Cummins engine	1
3	Gardner-Denver mud pump with adequate flow to suit DTHR300 rig	1
4	4 1/2" Tricone bit, steel tooth, medium-hard formation, c/w 2 3/8" Reg pin	100
5	4 1/2" Tricone bit, steel tooth, hard formation, c/w 2 3/8" Reg pin	100
6	4 1/2" Drag bit, 4blade type, c/w 2 3/8" Reg pin	100
Accessories and spare parts		
7	Lay key to suit 2 3/8"	1
8	Top adapter	1
9	Bit spanner	1
10	Repair kit for HALCO super Dominator 400 hammer	2
11	Air driven grinder	1
12	13 mm combination	4
13	Liquid drilling Polymer, 25 ltr drum	3
14	150 m of cable for downhole sensor	6
Spare parts for DTHR 300 rig		
15	1 1/4" chicksan	1
16	Ring	4
17	Ring	4
18	Water swivel bearing	4
19	Water swivel bearing	2
20	Swivel seal	5
21	Rotary mud hose	1
22	Rotary head seal kit	5
23	1 1/4" swivel seal kit	1
24	1 1/4" swivel bearing kit	4
25	2" swivel seal	2
26	2" swivel bearing	2
27	Disk valve service	4
28	Fuel filter	8
29	Fuel/water separator	15
30	Oil filter	15
31	Primary air filter	5
32	Temp, switch	1
33	Valve swing	1
34	Valve press.	1
35	Switch, ring	10
36	Bulb set	1
37	Complete spare parts kit for downhole sensor	3
Technical support		
38	The contractor should be ready to delegate two expert technicians:	

- | | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| <ul style="list-style-type: none">- one expert technician to operate the rig and to train the Syrian technicians for one month.- one expert technician to operate the seismograph (ABEM STRATAVISOR NZ and related software) and to train the Syrian technicians for one month.- Cost per expert/day should be quoted.- Air tickets for the two experts will be on contractors account while accommodation and in-syria transportation will be on SPC's account. | |
